

## Faculty and Staff

The main teachers is an an internationally recognized expert in Veterinary Anaesthesia, a Diplomate of the European College of Veterinary Anaesthesia and Analgesia (ECVAA) and the founder of VASTA, **Dr. Peter Kronen**, founder of **VASTA**.

He has vast experience with teaching, particularly VASTA in in it's 13th year now and expanding rapidly in a global fashion.

## Examination and Recognition

Once all 3 modules and respective homework have been completed, the courses can be concluded with an examination. Passing the exams, a certification as VAT (Veterinary Anaesthesia Technician) can be obtained –for AVA-members as a co-signed certificate.

VASTA is recognized and periodically reevaluated by AVA, IVAPM, AVTA, Bpt, GST, VSTPA, VITAR, VNCA and VÖK (all national professional organisations in the countries of operation and the international/global anaesthesia and analgesia-related organisations).

## Fees

*Per Module* EUR 1'000

*Examination:* EUR 300.

***Fees include all materials and catering during the courses.***

## Veterinary Anaesthesia School for Veterinarians and Technicians.

**Romania - courses @**

**Zet Diagnostic Medical and Training Center**

## About VASTA

The Veterinary Anaesthesia School for Technicians and Veterinarians was founded 2007 by Veterinary Anaesthesia Services International (VAS) in Switzerland. Due to its extraordinary success, it is now expanding to Romania. The aim of the school is provision of a sound and well founded education in Anaesthesia to Veterinary Technicians and Veterinarians.

VASTA delivers a structured Continuing Education within a larger clinical context and is well inserted in the international network of Anaesthesia experts within ECVA/AVA/AVTA. The growing VASTA family consists of VATs all over Europe and provides an exchange platform between trained Nurses and European Specialists in Anaesthesia and Analgesia.

## Concept

VASTA is an internationally recognised intensive course in Veterinary Anaesthesia structured in 6 weekend modules.

Contents of the modules comprises:

- Physiology and Pathophysiology as related to Anaesthesia
- Pharmacology
- Anaesthetic Techniques
- Pain Management
- Equipmentology and Monitoring
- Clinical Anaesthesia

## Goals

The main focus of the course lays in the practical application of anaesthesia knowledge. We offer expertise and knowledge to personnel in veterinary practices and other institutions to help make anaesthesia and analgesia safer and better for animals in our care. The course contributes to improve professional handling and care during the surgical intervention and the peri-operative period. The responsibility stays with the veterinary surgeon.

## Target Group

Veterinarians and Technicians in Veterinary Practices, Clinics and Research groups.

The maximal number of registrants is 25, and the minimum is 16.

## Modules

**Internationally recognised intensive course in Veterinary Anaesthesia structured in 3 week-long modules taught by Diplomate ECVA!**

The 3 modules consist of theoretical and practical training procured in subject blocks.

Each module expands over 5 days. The whole course is offered over 1-1.5 years.

For missed modules, individual arrangements can be made.

Registrants have the possibility to engage in exchange with the whole European VAT-network and the instructors directly in between the modules and after the course. For each module, there is a homework package provided to facilitate revision of topics of each module. Homework is corrected by VASTA faculty.

The successful completion is mandatory for admission to the final examination.
